AYODEJI OLA

FULL STACK DEVELOPER

ayodeji.ola.e@gmail.com
+234 906 119 6902
Ilorin, Kwara State, Nigeria

Full Stack Developer with a proven track record of building high-performance, scalable, and user-focused web applications. Proficient in modern frontend frameworks (React, TypeScript, Tailwind CSS) and experienced in backend development with Node.js, Express, and database technologies (MongoDB, SQL). Skilled at integrating RESTful APIs, designing efficient data models, and implementing best practices in coding, deployment, and version control. Adept at delivering responsive, accessible, and maintainable solutions while collaborating in Agile teams. Passionate about leveraging technology to create impactful end-to-end applications and staying ahead of emerging industry trends.

WORK EXPERIENCE

Software Developer (Frontend Focused)

McGeorge Consulting Ltd. *April 2024 - November 2024*

- Led agile development and launch of Havva, an AI-driven medical diagnostic chatbot that expanded user access to critical health information for hundreds of early users during MVP testing.
- Implemented and optimized complex Figma-based UI designs, reducing UI defects by 20% during QA, with pixel-perfect interfaces.
- Reviewed and refactored project codebases, introducing performance optimizations and reusable components that cut development time for release of new features and maintenance by ~30%.

Full stack Developer

Zoomfood *March 2024 - Present*

- Led development of the web platform using React and SASS, achieving load times below 1 second.
- Applied coding best practices and built reusable components, improving maintainability and shortening feature development cycles by over 30%.
- Integrated the frontend with a RESTful API backed by a MongoDB NOSQL database and AI-powered chatbot, streamlining MVP testing and reducing order placement time for customers.

Frontend Developer

(Freelance) *June 2022 - January 2024*

- Built and maintained full-stack web applications across e-commerce, education, gaming and productivity domains.
- Optimized client applications and websites for speed and performance, reducing load times by up to 40% and improving overall user retention.
- Optimized MongoDB schemas and queries for full stack applications, reducing query latency by 20% and improving overall API performance through transactions and aggregation pipelines.

SKILLS

React, TypeScript, Tailwind, Jest, Code Debugging, RESTful API Development and Integration, Node.js, MongoDB NoSQL Database Management, Version Control with Git, CI/CD Pipelines, Agile, Collaboration, Communication, Problem Solving, Adaptability, Time Management

EDUCATION

B.Eng. Computer Engineering, University of Ilorin, Kwara State, Nigeria

2019 - 2025

PORTFOLIO AND PROFILES

Portfolio includes scalable and performant full-stack applications in E-commerce, Hospitality, EdTech and Productivity industries(React, Node.js, MongoDB) with appropriate links.
